**Who we are:**

**W**e are an American company based out of Seattle/Yakima, Washington, made up from a select group of artist from around the world. Many of us have years of experience in the field of architecture and have pursued the illustrative side of the profession due to our artistic natures. We are strongly positioned to cater not only to our North American clients, but clients from around the world as well. Taking advantage of the global economy and markets of today, we provide excellent services at competitive prices.

**O**ur studio is comprised of individuals who are personally invited to join our team due to their professionalism, reputation and body of work. From architectural visualization production houses, to major game studios, our team members have a vast wealth of experience. We are active in our craft, the field of architectural visualization and computer graphics, and participate in the global CG community. We stay current on the latest hardware, software and CG techniques and continually strive to advance in our craft. We are skilled artist with strong technological knowledge and architectural visualization experience.

## 3DAllusions LLC

At **3DAllusions** we are passionate about our craft, so passionate we've created a whole community of like minded artist to share ideas and techniques in order to constantly improve our skill set. This passion is reflected in everything we do! Check out **3DAllusions.com!**

We eat and breathe computer graphics and are constantly honing our skills. We are artist doing what we love to do and it shows in our work.

**At 3DAllusions you will find:**

- Industry news, reviews, interviews, tutorials, artist spotlights and resources.
- Our community focuses on Architectural Visualization.
- Experts in the field sharing their knowledge and techniques.
- Artist perfecting their craft through interaction and critiques from veterans.

## Visualizing Possibilities!

# 3DAllusions Visualizing Possibilities!

## Why should you seek visualization services?

There is the age old saying, "A picture says a thousand words", and it is true that an image speaks volumes and transcends language barriers. A visual image makes the most impact and is the most easily remembered medium, shouldn't yours reflect the most positive aspects of your project or product?

In the competitive market your vision should shine and translate into a memorable image in the minds of your prospective clients and target audience? Whether it is marketing material, publishing, exhibitions, contest or presentations, 3D visualization makes a positive impact and when done correctly sets you above the competition.

One of the greatest strengths of 3D visualization is the ability to communicate a vision that has not yet become a reality, allowing you to sell an idea! Think of the cost savings of not having to build a mock up, prototype, or even an actual building before approaching potential customers or pursuing investors, you have eliminated a great amount of up front resources and are allowed to pursue the feasibility of the project while visually expressing your vision/design.

At 3DAllusions our motto is "**Visualizing Possibilities**", it is what we do and enjoy. Let us focus our passion on your next endeavor and "**Recognize the Possibilities**"!

## What we Do

**al-lus-sion:** 1 : the act of alluding or hinting at 2 : an implied or indirect reference

### Our Mission
To provide clientele with the visual aides necessary to express their concepts and ideas. With the use of cutting edge technology and software we allude to previously unvisualized reality's.

### Services
As multi-disciplined design/technical professionals located around the world, we are constantly striving for quality and excellence in the services we provide.

Our expertise ranges from architectural visualization modeling/rendering to architectural animation. We also provide services for product illustration, advertising and marketing material.

Our medium of creation ranges from a simple canvas to raytraced digital pixels screaming across a computer screen.

As skilled artisan's of the computer graphics renaissance we are prepared to exceed your expectations. Below are some of the services we offer:

Architectural Visualization | Interior Visualization | Animation/Walk-thrus | 3D Graphics/Modeling | Photomontage Work | Furniture Modeling | Pre-Visualization | Non-Photorealistic | Product Illustration | Architectural Illustration | Project Presentation | Marketing Material | Graphic Design | Design Consultation | More...
